## Monthly Bulletin

January 2020

### ACTIVITY REPORT

### MARKET PERFORMANCE

#### Equities Report

The new year started off with a tremendous performance on the bourse. The trading volume for January 2020 was 167,683,250 with a turnover of UGX. 13,990,081,666 as compared to 47,779,920 traded in January 2019 with a turnover of UGX. 4,686,430,471. The increased activity on the UMEME and Stanbic Uganda Holdings Limited counters shows great optimism and promise on the part of the investors in the economy and we couldn't be more pleased.

However, Despite a steady influx of foreign and regional participation in the market, turnover levels remained significantly low with the month registering a turnover of UGX. 13.9 bn from 55.4bn recorded in the preceding Month (December 2019) – representing a daily average turnover of approximately 635.9m. Similarly Volume traded dropped to 167.6 million shares compared to 216.1million shares traded in December 2019. Number of deals presented a slight increase of 455 deals up from 451 deals in December 2019, with 70 per cent of the deals being done on the Stanbic Uganda Holdings Limited and UMEME Limited counters.

#### Turnover performance per counter

The Month saw UMEME Limited take the first position, with the counter posting 77.5 per cent of the total turnover, followed by Stanbic Uganda Holdings Limited accounting for 22.1 per cent of the turnover. In third position was CIPLA QCiL closing at 0.16 per cent. Bank of Baroda Uganda, DFCU Limited, Uganda Clays Limited, New Vision Limited and National Insurance Corporation recorded 0.24 per cent all together of the total turnover. The rest of the cross-listed securities had no turnover positions.

#### Volume traded per counter

Stanbic Uganda Holdings Limited registered the highest volume of shares executed, with a representation of 72.77 percent, followed by UMEME Limited with 26.98 percent. CIPLA QCiL came third with 0.11percent of the volume, while Uganda Clays had approximately 124,000 shares being traded and hence representing 0.07 per cent of the total volume. Bank of Baroda and National Insurance Corporation accounted for 0.06 per cent and 0.01 per cent respectively. New Vision Limited had a negligible position which registered 650 shares traded, representing approximately 0.001 per cent.

#### Trading Volumes and Activity on a Monthly Basis

	January 2020	January 2019
Volume Traded	167,683,250	47,779,920

# ECONOMIC & FINANCIAL DEVELOPMENTS: January – 2020

## INFLATION – OUTLOOK AND RISKS

The inflation outlook remained broadly unchanged from the October 2019 projection. Annual core inflation and headline inflation are projected to remain below 5 percent in the near term. However, core inflation is projected to converge to the target of 5 percent in the medium-term. Nonetheless, the forecasts are susceptible to a number of risks. On the downside, low commodity prices, a decline in global inflationary pressures coupled with slackened global growth could lead to lower domestic inflation. However, on the upside, worsening weather conditions could lead to higher food crop inflation. In addition, the instability in the global financial markets and uncertainty during the election period could lead to a depreciation of the exchange rate, which could translate into higher inflation. Lastly, a rise in fiscal deficit could also lead to inflationary pressures going forward.

### Inflation outlook.

Source: Bank of Uganda (Dec 2019 Monetary policy report)

## INTEREST AND LENDING RATES

Treasury bill yields in the primary market declined in line with the monetary policy stance. In the three months to November 2019, yields on the 91-day, 182-day and 364-day Treasury bills continued to trend in line with CBR, declining to 8.6 percent, 10.6 percent and 11.4 percent from respective values of 9.4 percent, 10.9 percent and 11.5 percent. Yields on treasury bonds with the exception of the 10-year paper rose in the quarter to November 2019 compared to quarter to August 2019. During the same period, yields on the 3 year and 15 year bonds rose to respective rates of 14.3 percent and 15.1 percent, from 13.6 percent and 14.9 percent. Additional amounts were awarded on longer dated tenors in anticipation of under subscriptions in auctions in the festive season. In line with movements in the primary market, yields edged up across the maturity spectrum in the secondary market. The rise in yields could be seasonal in anticipation of tighter liquidity conditions on account of end-year corporation taxes and high demand for cash during the imminent festive season. The increase in yields on longer dated risk free paper signals higher inflation expectations in the medium-term.

Source: Bank of Uganda (Dec 2019 Monetary policy report)

As at end of January 2020 the Central Bank Rate was at 9.0, Lending Rate at 13.0, 91-day T-Bill 9.7 yield and 364-day T-Bill 13.6 yield

## FOREIGN EXCHANGE RATE DEVELOPMENT

The Uganda shilling remained relatively stable with an appreciation trend against the US Dollar despite the strengthening of the US Dollar against major international currencies. In the three months to November, the shilling appreciated by 0.5 percent compared to the previous quarter. Similarly, on a year-on-year basis, the shilling appreciated by one percent in November 2019 to UGX3, 697.4/US\$. The relative stability is attributed to net forex supply in the IFEM due to export receipts, strong inflows from offshores, NGOs and amidst relatively subdued demand. On a trade-weighted basis, the nominal effective exchange rate (NEER) appreciated by 1.5 year on-year and 1.2 per cent quarter-on-quarter. In real terms, the Real Effective Exchange rate (REER) depreciated by one per cent month-on-month. The Real exchange rate appreciation of the shilling is to a large extent driven by a nominal appreciation of the shilling which bonds well with the low domestic inflation environment as depicted below.

### Changes in the NER, Inflation Differential and REER

## Government Yield Curve Trend: January 2020

Source: Bank of Uganda

### Corporate Bond Activity: January 2020

The corporate Bonds segment remained inactive throughout the period. Investors in this segment have continued to hold onto their investments and receive interest that is paid out semi-annually. Below is a list of corporate bonds listed on the USE;

1. African Development Bank Bond maturing on 01.02.2022
2. Kakira Sugar Limited Bond maturing on 07.12.2023

## EDUCATION COLUMN

### UNDERSTANDING GROWTH ENTERPRISE MARKET SEGMENTS (GEMS)

The Uganda Securities Exchange (USE) has a Growth Enterprise Market Segment (GEMS). GEMS enables firms to raise substantial initial and ongoing capital, while benefiting from increased profile and liquidity within a regulatory environment designed specifically to meet their needs.

The establishment of a GEMS market in Uganda paved way for the listing of Small and Medium Sized Enterprises (SMEs) on the Exchange, which is a major driver of our country's economy." The GEMS is supported by a wide community of experienced advisors, ranging from brokers to accountants, lawyers and the fundamental Market Advisors who assist companies to list on GEMS and comply with good corporate governance and global best practices. The establishment of this market is bound to be a fundamental contributor to the stability of the overall financial system of our country.

### Requirements unique to the Growth Enterprise Market Segment (GEMS)

- The applicant does not meet at least one of the requirements for listing on MIMS.
- The applicant has entered into a Market Advisory Agreement with a Market Advisor effective for 2 years from application date.
- That the founding shareholders, for a company admitted to GEMS with a trading record of less than five years, agree not to dispose off their interest in the applicant except by way of delisting or reclassification to the MIMS
- Founding shareholders of a company admitted on GEMS with a trading record of less than five years, can only

dispose off their interest, after a period of three years has elapsed from its admission on the GEMS or when the company has acquired a trading record of five years

- That the participation in the issue for a company that has been in existence for one year or less is restricted to professional investors
- Public company registered under the Companies Act;
- Free transferability of shares;
- Adequate working capital and solvency;
- Operation for at least one year;
- No profitability record required;
- 5 directors, 1/3 non-executive;
- Directors with no bankruptcy, fraud, criminal offence or financial misconduct proceedings;
- Competent board and senior management – at least 1 year experience in the business;
- All issued shares to be immobilized;

The table below presents a comparison of the requirements for eligibility and conditions for listing on the Official List of the USE and listing on the Growth Enterprise Market Segment of the USE

	Main Investment Market Segment(MIMS)	Growth Enterprise Market Segment
Type of Company	Public limited liability company	Public limited liability company
Minimum share Capital	Minimum authorized issued and fully paid up share capital of UGX1billion before the public offering of shares	Not required
Minimum net assets	Net assets of UGX 2 billion before the public offering of shares	Not required
Financial history	Published audited financial statements for a period of at least 5yrs	Not required
	Prepared financial statements for the latest accounting period on a going concern basis	Statement of assets and liabilities for company that is one year and less
Profitability requirement	Declaration of positive profits after tax attributable to shareholders in at least 3 of the last 5 completed accounting periods prior to public offer	Not required
Minimum shareholding	Immediately following the public offer, 20% of shares shall be held by not less than 1000 shareholders	Not required

## Fees Requirements and costs of going public

It is important to note that there are costs associated with an Initial Public Offer (IPO) and initial listing on the USE. At a minimum, the company would require the following:

No.	Item	Fees Requirements
1	CMA	0.1% of the value of the listing
2	USE	0.1% of the value of the funds raised at the IPO
3	Professionals (Accountants, Lawyers, Media etc)	Negotiated between company and service provider
4	Transaction Advisors	Negotiated between company and service provider
5	Sponsoring Brokers	Negotiated between company and service provider

The CMA (Prospectus) Regulations, 1996 require the issuer to disclose the planned application of the proceeds of the issue. Such a disclosure includes brokerage expenses, approval fees, printing costs, legal and advisory costs.

The above costs, which are associated with the IPO, are paid out of the share price of the IPO. Such costs are therefore not paid by the company but rather are paid by the incoming/new shareholders. They therefore should not be a deterrent to listing on the exchange.

	MIMS (UGX)	GEMS (UGX)
Application for listing	4,000,000	2,000,000
Re-submission of application for listing	1,000,000	1,000,000
Initial listing	0.2% of the value of the securities to be listed subject to a minimum of 200 currency points	0.1% of the value of securities to be listed
Additional listing	0.2% of the market capitalization of the additional securities to be listed	0.1% of the market capitalization of the additional securities to be listed
Annual listing * The annual listing fee will be calculated on the basis of a 12 month average market capitalization	0.05% of market capitalization of the issuer subject to a minimum of 200 currency points and a maximum of 5,000 currency points.	0.05% of market capitalization of the issuer subject to a maximum of 1000 currency points

## FREQUENTLY ASKED QUESTIONS ON GEMS

### 1. What type of company is the GEMS designed for?

The GEMS is ideally suited for small to medium sized companies which are fast growing and looking for additional sources of capital to fuel growth.

### 2. What are the benefits of listing on the GEMS?

The benefits of listing on the GEMS include the following:

- Easier and cheaper capital raising
- Enhanced brand and credibility
- Positive impact on internal culture
- Increased strategic flexibility

### 3. What are the specific benefits of listing on the GEMS?

- Profile: Companies listed on the GEMS will benefit from higher visibility
- Cost-efficiency: GEMS has lower listing costs and lower ongoing compliance costs. GEMS has also lower disclosure requirements as compared to the Main Market
- Flexibility: Ongoing flexibility to facilitate growth

### 4. Will I lose control of the company?

No. You retain as much ownership in the company as you want through your holding in equity securities. All you are doing by listing is giving up a portion of your ownership to shareholders in exchange for capital.

### 5. What is the difference between the Main Investment Market Segment and the Growth Enterprise Market Segment?

The key differences can be summarized as follows:

- Lower costs
- Lower level of compliance
- Simpler and cheaper listing documentation

### 6. Our company is thinking about listing. What should we do to make it happen?

You can then contact the Products & Markets department of the Uganda Securities Exchange.

### 7. What documentation is required for an application to list on the segment?

All applicants will have to submit a fully-fledged admission document as per clause 7(1) of the GEMS rules. However applications are reviewed and considered on case by case basis.

### 8. When should we announce to the market that we intend to list?

The decision to announce your intention to list should be considered carefully. Once you announce that you intend to become listed, you will start to receive an increased level of attention regarding your company and its listing strategy. Some companies announce their intentions early; others leave it until the last minute.
